

Pipe shielding

Data sheet E11

Application	Lead pipe shields are a cast lead product for shielding soil and waste pipes used for removing radioactive or contaminated waste.
Description	The cast pipes are precision machined along their edges and ends to create a shielded 'tube' when assembled.
Finish	The pipe shields are a lead product and should therefore be covered over / boxed in by the contractor to avoid contact with personnel.
Dimensions & shielding	Pipe shields are manufactured to order to shield most applications.
Installation	The pipe shields are fixed with heavy duty galvanised clamps.

Availability The pipe shields are generally manufactured to order although some shield sizes are already available. The delivery period is around 6 weeks.
